

Who we are

AlphaGate is the One-Stop-Shop for holistic operation, observation and analysis of devices, machines and plants. With our team we create modern operating concepts, individual user interfaces and process-optimized data acquisition and analysis.

Our product range A-VIS completes the customer needs after targeted intervention and configuration of the software during the entire lifecycle. We give our customers support to be the best and to stay the best in their business and to supply the whole world.

In order to strengthen our team we are looking for the following at the earliest possible date:

Java / HTML Software – Developer (F/M)

Your tasks:

- ◆ Evaluation of customer requirements
- ◆ Creating software concepts
- ◆ Implementation of customer applications
- ◆ Commissioning of the applications

Your skills:

- ◆ Technical education
- ◆ Java knowledge (HTML / WEB - knowledge of advantage)
- ◆ Experience in dealing with modern development methods
- ◆ Team player
- ◆ German language skills of advantage

What we offer:

- ◆ Varied tasks from different industries from medical devices to large presses
- ◆ Use of the latest technologies
- ◆ Flexible, family-friendly working hours
- ◆ Competent, motivated team
